CHAIN DEPENDENT CONTINUOUS TIME RANDOM WALK

Władysław Szczotka
Piotr Żebrowski

Abstract: An asymptotic behavior of a continuous time random walk is investigated in the case when the sequence of pairs of jump vectors and times between jumps is chain dependent.

2000 AMS Mathematics Subject Classification: Primary: 60G50, 60F17; Secondary: 60H30.

Keywords and phrases: Continuous time random walk, chain dependence, Lévy process, Lévy measure.
