

We – Allianz Deutschland AG – as one of our groups' flagship have set up an advanced and high-end Analytics Center in Wroclaw in summer 2019. Our main task is to serve as decision-making support for our top management and the relevant specialist areas and to meet the regulatory requirements under Solvency II.

You are studying mathematics or a math-related subject? You are looking for a successful start to your career with ambitious and challenging tasks within an international environment? Then we are looking for you!

Quantitative Analyst

in the corporate actuary department of our Allianz Deutschland Office in Wroclaw

Your Tasks:

- Participation in maintaining and further develop the internal deterministic and stochastic corporate model for the calculation of solvency-, new business- and annual financial statement ratios
- Support determining the medium- and long-term development (local GAAP and IFRS) of important balance sheet and performance figures
- Examination the future financial viability of profit participation,
- Participation in answering fundamental strategic questions (e.g. IFRS 17),
- Actuarial and statistical investigations

Our Requirements:

- Master's or PhD degree in mathematics, physics or related with proven track record
- Experience of working in financial institution would be a plus (ideally in actuarial or related)
- Very good analytical and conceptual skills to analyze complex technical issues independently and promptly and to prepare them for specific target groups.
- Very good English, German would be a plus
- Will to continuously extend your work knowledge, for example actuarial training or basic programming (Java, Python)

We offer:

• Unique opportunity for professional development providing advanced and complex analysis using high-end tools and software

- Opportunity for international career and business travels
- Competitive salary together with yearly bonus
- Great working atmosphere based on constant development and mutual support
