Boundaries of hyperbolic Coxeter groups in low dimensions - a survey

Abstract: I will make a survey of various results from the literature which together allow the complete classification (in terms of nerves) of those hyperbolic Coxeter groups whose Gromov boundaries are homeomorphic to Sierpiński curve, and to Menger curve, respectively.

ZOOM meeting info:

Meeting ID: 945 9956 8132

Meeting password: "GS" (two letters) followed by the Euler characteristic of the closed orientable surface of genus 89.
