Jan Dymara (UWr)

Growth series of Coxeter groups

Abstract: Several classical formulae for the growth series of a Coxeter group will be proved in a new way. The proof will use the structure of the Coxeter complex, the Davis complex, or the Tits non-complex.

ZOOM meeting info:

Meeting ID: 967 6507 7409

Meeting password: "GS" (two letters) followed by the Euler characteristic of the closed orientable surface of genus 89.
