LIST OF RESEARCH PUBLICATIONS

Zbigniew J. Jurek

February 1, 2007

68. Random integral representations for free-infinitely divisible and tempered stable distributions, *Stat.& Probab. Letters*, **77** no. 4 , 2007, pp. 417-425.

67. Cauchy transforms of measures viwed as some functionals of Fourier transforms, *Probab. Mat. Stat.* **26**, no. 1, 2006, pp. 187-200.

66. Kazimierz Urbanik (1930-2005),*Probab. Math. Stat.* **25**, no. 1, 2005, pp. 1-22. (with J. Rosiński and W.A. Woyczyński)

65. Selfdecomposable laws associated with hyperbolic functions, *Probab. Math. Stat.* **24**, no. 1, 2004, pp. 41-50. (with M. Yor)

64. A new factorization property of the selfdecomposable probability measures, *Ann. Probab.* **32**, No. 2 (2004), pp. 1356-1369. (with A. M. Iksanov and B. M. Schreiber)

63. The random integral representation hypothesis revisited: new classes of s-selfdecomposable laws. In: ABSTRACT AND APPLIED ANALYSIS; *Proc. International Conf. Hanoi, Vietnam 13-17 August 2002;* pp. 495-514. WORLD SCIENTIFIC, June 2004.

62. Generalized Lévy stochastic areas and selfdecomposability. *Stat.& Probab. Letters,* vol. **64** (2003), pp. 213-222.

61. Shot noise distributions and selfdecomposability. *Stochastic Anal. Appl.* vol. **21**, No 3, (2003), pp. 593-609. (with A. M. Iksanov)

60. On fixed points of Poisson shot noise transforms. *Advances of Applied Probab.* vol. **34** (2002), pp. 798-825. (with A. M. Iksanov)

59. A special volume of Demonstratio Mathematica XXXIV(2), 2001 (pp. 215-512), dedicated to Kazimierz Urbanik; W. Dziubdziela, Z. J. Jurek, A. Plucinska and L. Stettner Editors.

58. Kazimierz Urbanik and his research. *Demonstratio Math.* **XXXIV**(2), 2001, pp. 219-239. (with J. Rosinski and W. A. Woyczynski)

57. Remarks on the selfdecomposability and new examples. *Demonstratio Mathematica,* **XXXIV**(2), 2001, pp. 241-250.

56. 1-D Ising models,geometric random sums and selfdecomposability. *Reports on Math. Physics,* **47** (2001), pp. 21-30.

55. Lee-Yang models, selfdecomposability and negative definite functions. In: High dimensional probability II; E. Gine, D. M. Mason, J. A. Wellner Editors; *Progress in Prob.* vol. **47**, Birkhäuser 2000, pp. 349-367. (with J. DeConinck)

54. Three algebraic problems in probability theory. *Contemporary Mathematics,* vol. **261** (2000), pp. 221-226.

53. A note on gamma random variables and Dirichlet series, *Stat. Prob. Letters,* **49** (2000), pp. 387-392.

52. Large deviations for some Poisson random integrals. *Seminare des Probabilites XXXIV;* Azema,Bakery and Yor Eds. *Lect. Notes in Math.* vol. **1729** (2000), pp. 185-197. (with L.Wu)

51. Selfdecomposability, stopping times and perpetuity laws, *Prob. Math. Stat.* **19** (1999), pp. 413-419.

50. s-stable laws: an application in insurance and a generalization to nilpotent Lie groups, *J. Theor. Prob.* **12** (1999), pp. 1089-1107. (with D. Neuenschwander)

49. Different aspects of selfdecomposabilty, *MaPhySto Centre for Mathematical Physics and Stochastics,* Aarhus University, Miscellanea **11**, April 1999, pp. 84-90.

48. Selfdecomposability : an exception or a rule?, *Annales Uni. M.Curie-Sklodowska* , Serie A, vol. **51** (1997), pp. 93-107.

47. Series of independent exponential random variables. *Proc. 7th Japan-Russia Symposium on Probab. Theory and Math. Statistics;* World Scientific 1996, pp. 174-182.

46. Some analytical semigroups occuring in probability theory, *J. Theor. Probab.* **10** (1996), pp. 745-763. (with K. H. Hofmann)

45. s-Stability and random integral representations of limit laws. *Demonstratio Math.* **29** (1996), pp. 365-370.

44. (Lie)Semigroups and probability : A Survey. In : *Semigroups in Algebra, Geometry and Analysis* , K.H. Hofmann, J.D. Lawson , E. Vinberg Eds, de Gruyter Expositions in Mathematics, 1994, pp. 355-365.

43. *Operator-limit distributions in probability theory.* Wiley Series in Probability and Mathematical Statistics, New York, 1993. (A monograph with J. David Mason.)

42. Fourier transforms of measures from classes $U_\beta, -2 < \beta < -1$. *J. Multivariate Analysis* **41** (1992), pp. 194-211. (with B. Schreiber).

41. Random integral representations for classes of limit distributions similar to Lévy class L_0. III. Proc. 8th Conf. Prob. Banach Spaces, Bowdoin College, New Brunswick, ME, USA, July 1991. *Progress in Probability* vol. **30**, pp. 137-151. Birkhäuser 1992.

40. Operator exponents of probability measures and Lie semigroups. *Ann. Probab.* **20** (1992), pp. 1053-1062.

39. On Lévy (spectral) measures of integral form on Banach spaces. *Prob. Math. Statist.* **11** (1990), pp. 139-148.

38. Random integral representations for classes of limit distributions similar to Levy class L_0. II. *Nagoya Math. Journal* **114** (1989), pp. 53-64.

37. Linear supports and absolute continuity of certain random integrals. Proc. 4th Conf. Prob. Vector Spaces, Lancut, Poland, June 1987. *Lecture Notes in Math.* **1391** (1989), pp. 140-147.

36. Remarks concerning the theory of operator-limit distributions. *Bull. Pol . Acad. : Math.* **36** (1988), pp. 307-313.

35. Random integral representation for classes of limit distributions similar to Lévy class L_0. *Prob. Theory Related Fields* **78** (1988), pp. 473-490.

34. Continuity of certain random integral mappings and uniform integrability of infinitely divisible measures. *Theory of Prob. and Appl.* **33** (1988), pp. 560-572. (with J. Rosinski)

33. The symmetry group and exponents of operator-stable probability measures. *Ann. Prob.* **14** (1986), pp.1014-1023. (with W. N. Hudson and J. A. Veeh)

32. Random integral representation for another class of limit laws. Proc. 5th Conf. Prob. Banach Spaces, Medford, Mass. USA, July 1984. *Lecture Notes In Math.* **1153** (1985), pp. 297-309.

31. Relations between the s-selfdecomposable and selfdecompsable measures. *Ann. Prob.* **13** (1985), pp. 592-608.

30. Limit distributions in generalized convolution algebras. *Prob. Math. Stat.* **5** (1985), pp. 113-135.

29. On polar coordinates in Banach spaces. *Bull. Pol. Acad.: Math.* **32** (1984), pp. 61-66.

28. How to solve the inequality: $U_t m < m$ for every $0 < t < 1$? *Prob. Math. Stat.* **4** (1984), 171-183.

27. Limit distributions and one-parameter groups of linear operators on Banach spaces. *J. Multivar. Anal.* **13** (1983), pp. 578-604.

26. The classes $L_m(Q)$ of probability measures on Banach spaces. *Bull. Acad. Pol.*

25. An integral representation for selfdecomposable Banach space valued random variables. *Z. Wahrscheinlichkeitstheorie und verw. Gebiete* **62** (1983), 347-362. (with W. Vervaat)

24. Generators of some classes of probability measures on Banach spaces. *Trans. 9th. Prague Conf. Information Theory, Stat. Dec. Funct. and Random Processes,* June 28- July 2, 1982. Academia Prague 1983 , 33-38.

23. S-selfdecomposable probability measures as probability distributions of some random integrals. *Coll. Math. Societatis Janos Bolyai,* vol. **36**. Limit theorems in probab. statist. (1982), 617-629.

22. How to solve the inequality :$U_t m < m$ for every $0 < t < 1$? II. *ibidem,* pp. 477-483.

21. Remarks on V-decomposable measures. *ibidem,* pp. 395-401.

20. An integral representation of operator-selfdecomposable random variables . *Bull. Acad. Pol. Sci.* **30** (1982), pp. 385-393.

19. Domains of normal attraction for G-stable measures on R^d. *Theory of Probab. and Appl.* **27** (1982), pp. 396-400.

18. Structure of a class of operator-selfdecomposable probability measures. *Ann. Probab.* **10** (1982), pp. 849-865.

17. Convergence of types, selfdecomposability and stability of measures on linear spaces. Proc. 3rd Conf. Probab. Banach Spaces, Medford, Mass. USA, August 4-16, 1980. *Lecture Notes in Math.* **860**, pp. 257-267.

16. Some characterizations of the class L in generalized convolution algebras, *ibidem,* pp. 409-415.

15. The problem of B.V. Gnedenko on Banach spaces. *ibidem,* pp. 399-407.

14. On integrability with respect to infinitely divisible measures. *Bull. Acad. Pol. Sci.* **29** (1981), pp.179-186. (with J. Smalara).

13. On Gaussian measures on Rd. *Proc. 6th Conf. Prob. Theory,* Brasov, Sept. 10-16, 1979. Ed. Acad. Sci. Bucuresti 1981, pp. 313-316.

12. (**Ph. D. Thesis, June 1977**). Limit distributions for sums of shrunken random variables. *Dissertationes Mathematicae*, vol. **185**, PWN Warszawa 1981, (46pp.).

11. On stability of probability measures in Euclidean spaces. *Lecture Notes in Math.* **828** (1980), pp. 128-145.

10. Central limit theorem in Euclidean spaces. *Bull. Acad. Pol. Sci.* **28** (1980), pp. 81-86.

9. Domains of normal attraction of operator-stable measures in Euclidean space. *Bull. Acad. Pol. Sci.* **28** (1980), pp. 128-145.

8. Remarks on operator-stable probability measures. *Commentationes Math.* **XXI** (1979), pp. 71-74.

7. A representation of the characteristic functions of stable distributions in Hilbert spaces. *Banach Center Publications,* vol. **5** PWN Warsaw (1979), pp. 151-158.

6. Properties of s-stable distribution functions. *Bull.Acad. Pol.Sci.* **27** (1979), pp. 77-83.

5. Remarks on stable measures on Banach spaces. *Colloq.Math.* **38** (1978), pp. 262-276. (with K.Urbanik)

4. Intersection of the classes of s-selfdecomposable and s-semistable distributions. *Lecture Notes in Math.*, **656** (1978), pp. 77-93.

3. Some characterizations of the class of s-selfdecomposable distributions. *ibidem,* **26** (1978), pp. 719-725.

2. Truncated semi-stable probability measures. *ibidem,***25** (1977), pp. 73-78.

1. A limit theorem for truncated random variables. *Bull. Acad. Pol. Sci.* **23** (1975), pp. 911-916.
