Zbigniew J. JUREK

Institute of Mathematics

University of Wrocław

Pl. Grunwaldzki 2/4 ; 50-384 Wrocław, Poland

e-mail: zjjurek@math.uni.wroc.pl, webpage: www.math.uni.wroc.pl/~zjjurek

LIST OF RESEARCH PUBLICATIONS

0. O pewnej klasie rozkładów granicznych, *Praca Magisterska* (w j. polskim), Archiwum Uniwersytetu Wrocławskiego; Sygnatura IV-5200/Jurek , 1972.

[English transtation: *On some class of limiting distributions*; arXiv:1906.10522v1, math.PR, 25 June 2019.

Also it was published as a journal publication: On a limit theorem for non-linear scaling, *Stat. Probab. Letters*, vol.177 (2021), the paper no 88 on this list of publications.]

1975 - 1979

1. A limit theorem for truncated random variables, *Winter School of Probability* Karpacz 1975, *Lecture Notes in Math.* Springer Verlag, vol. 472, pp. 69-76.

2. A limit theorem for truncated random variables, *Bull. Acad. Pol. Sci.* vol. 23 (1975), pp. 911-916.

3. Truncated semi-stable probability distributions, *Bull. Acad. Pol. Sci.* vol. 25 (1977), pp. 73 -78.

4. Some Characterizations of the class of s-selfdecomposable distributions, *Bull. Acad. Pol. Sci.* vol 26 (1978), pp. 719-725.

5. Intersection of the classes of s-selfdecomposable and s-semistable distributions, *Lecture Notes in Math.* vol. 656 (1978), pp.77-93.

6. Remarks on stable measures on Banach spaces, *Colloq. Math.* vol. 38 (1978), pp. 261-276. (with K. Urbanik).

7. Properties of s-stable distribution functions, *Bul. Acad. Pol. Sci.* vol. 27 (1979), pp. 77-83.

8. A representation of the characteristic functions of stable distributions in Hilbert spaces, *Banach Center Publications* vol. 5 (1979), pp. 151-158, PWN Warsaw.
9. Remarks on operator-stable probability measures, *Commentationes Math.* vol. XXI (1979), pp. 71-74.

1980 - 1984

10. Central limit theorem in Euclidean spaces, *Bull. Acad. Pol. Sci.*, vol. 28 (1980), pp. 81-86.
11. Domains of normal attraction of operator-stable measures on Euclidean spaces, *Bull. Acad. Pol. Sci.*, vol. 28 (1980) pp. 128-145.
12. On stability of probability measures in Euclidean spaces, *Lecture Notes in Math.*, vol. 828 (1980), pp. 128-145.
13. **(Ph. D. Thesis)** Limit distributions for sums of shrunken random variables, *Dissertationes Mathematicae*, vol. 185, PWN Warszawa 1981, 46 pages; (accepted for publication on 29 November 1977).
14. On Gaussian measures on \mathbb{R}^d , *Proc. 6th Conf. Probab. Theory*, Brasov, Sept.10-16, 1979. Ed. Acad. Sci., Bucuresti 1981, pp. 313-316.
15. On integrability with respect to infinitely divisible measures, *Bull. Acad. Pol. Sci.*, vol. 29 (1981), pp. 179-186. (with. J. Smalara).
16. The problem of B.V. Gnedenko on Banach spaces, *Bull. Acad. Pol. Sci.*, vol. 29 (1981), pp. 399-407.
17. Some characterization of the class L in generalized convolution algebras, *Bull. Acad. Pol. Sci.*, vol. 29 (1981), pp. 409-415.
18. Convergence of types, selfdecomposability and stability on linear spaces, *Lecture Notes in Math.* vol. 860 (1981), pp. 257-267; (Proceedings of the third Conf. Probability in Banach spaces III).
19. Structure of a class of operator-selfdecomposable probability measures. *Ann. Probab.*, vol. 10 (1982), pp. 849-865.
[Also as Report 8141 July 1981, Katholieke Iniversitet, 6525 ED Nijmegen, The Netherlands.]
20. Domains of normal attraction for G-stable measures on \mathbb{R}^d , *Teor. Veroyatnost. Primenienia*, vol. 28 (1982), pp. 360-400. (Russian Edition).
21. Domains of normal attraction for G-stable measures on \mathbb{R}^d , *Theor. Probab. Appl.*, vol. 28 (1982), pp. ??? (English Edition).

- 22.** An integral representation of operator-selfdecomposable random variables, *Bull. Acad. Pol. Sci.*, vol. 30 (1982), pp. 385-393.
- 23.** Remarks on V-decomposable measures, *Bull. Acad. Pol. Sci.*, vol. 30 (1982), pp. 395-401
- 24.** How to solve the inequality $U_t m \leq m$ for every $0 < t < 1$? II, *Bull. Acad. Pol. Sci.*, vol. 30 (1982), pp. 477-483.
- 25.** S-selfdecomposable probability measures as probability distributions of some random integrals, *Colloq. Math. Societatis Janos Bolyai*, Limit Theorems in Probab. Stat. , vol 36 (1982), 617-629.
- 26.** Generators of some classes of probability measures on Banach spaces, *Trans. 9th Prague Conf. Information Theory , Stat. Decision Funct. and Random Processes*, June 28-July 2, 1982, Academia Prague 1983, pp. 33-38.
- 27.** An integral representation for selfdecomposable Banach space random variables, *Z. Wahrscheinlichkeitstheorie ind verw. Gebiete*, vol. 62 (1983), pp. 347-362, (with W. Vervaat).
[Also as Report 8121, July 1981, Katholieke Universitet, 6524 ED Nijmegen, The Netherlands.]
- 28.** The classes $L_m(Q)$ of probability measures on Banach spaces, *Bull. Acad. Pol. Sci.*, vol. 13 (1983), pp. 51-62.
- 29.** Limit distributions and one-parameter groups of linear operators on Banach spces, *J. Multivar. Anal. vol. 13 (1983)*, pp. 578-604.
- 30.** How to solve the inequality: $U_t m < m$ for every $0 < t < 1$? *Probab. Math. Stat.*, vol. 4 (1984),pp. 171-183.
- 31.** On polar coordinates in Banach spaces, *Bull. Pol. Acad.: Math.*, vol. 32 (1984), pp. 61-66.

1985 - 1989

- 32.** Limit distributions in generalized convolution algebras. *Probab. Math. Stat.*, vol. 5 (1985), pp. 113-135.
- 33.** Relation between the s-selfdecomposable and selfdecomposable measures, *Ann. Probab.*, vol 13 (1985), pp. 592-608.
- 34.** Random integral representation for another class of limit laws, *Lecture Notes in Math.* vol. 1153 (1985), pp. 297-309; [Proc. 5th Conf. Probab. Banach Spaces.]

- 35.** The symmetry group and exponents of operator-stable probability measures, *Ann. Probab.*, vol. 14 (1986), pp. 1014-1023; (with W. N. Hudson and J. A. Veeh.)
- 36.** Continuity of certain random integral mappings and uniform integrability, *Teor. Verojatnost. Primenenia*, vol. 33 (1988), pp. 560-572, (with J. Rosiński); [Russian Edition].
- 37.** Continuity of certain random integral mappings and uniform integrability, *Theory Probab. Appl.*, vol. 33 (1988), pp. 523-535, (with J. Rosiński); [English Edition].
- 38.** Random integral representation for classes of limit distributions similar to Lévy class L_0 , *Probab. Theor. Related Fields* vol. 78 (1988), pp. 473-490.
- 39.** Remarks concerning the theory of operator-limit distributions, *Bull. Pol. Acad. : Math.*, vol. 36 (1988), pp. 307-313.
- 40.** Linear supports and absolute continuity of certain random integrals, *Lecture Notes in Math.*, vol. 1391 (1989), pp. 140-147. (Proc. 4th Conf. Probab. Vector Spaces; Łańcut, Poland, June 1987)
- 41.** Random integral representations for classes of limit distributions similar to Lévy class L_0 . II, *Nagoya Math. Journal*, vol. 114 (1989), pp. 53-64.

1990 - 1994

- 42.** On Lévy (spectral) measures of integral form on Banach spaces, *Probab. Math. Stat.*, vol. 11 (1990), pp. 139-148.
- 43.** Operator exponents of probability measures and Lie semigroups, *Ann. Probab.* 20 (1992), pp. 1053-1062.
- 44.** Random integral representations for classes of limit laws similar to Lévy class L_0 , *Progress in Probability*, vol. 30, (1992), pp. 137-151, Birkhauser. [Proc. 8th Conf. Probab. Banach Spces, Bowdoin College, ME, USA July 1991.]
- 45.** Fourier transforms of measures from classes U_β , $-2 < \beta < -1$, *J. Multivar. Analysis*, vol. 41 (1992), pp. 194-211, (with. B. Schreiber).
- 46.** *Operator-limit distributions in probability theory*, Wiley Series in Probab. Math. Statistics, New York 1993. [A monograph with J. D. Mason.]
- 47.** (Lie) Semigroups and probability - a survey. In: *Semigroups in Algebra, Geometry and Analysis*, K. H. Hofmann, J. D. Lawson, E. Vinberg Eds, de Gruyter Expositions in Mathematics, (1994), pp. 355-365.

1995 - 1999

48. s-Stability and random integral representations of limit laws, *Demonstration Math.*, vol. 29 (1996), pp. 174-182.
49. Some analytical semigroups occurring in probability theory, *J. Theor. Probab.*, vol. 10 (1996), pp. 745-763. (with. K. H. Hofmann).
50. Series of independent exponential random variables. *Proc. 7th Japan-Russia Symposium on Probab. Theor. Math. Stat.* World Scientific, 1996, pp. 174-182.
51. Selfdecomposability: an exception or a rule?, *Annales Uni. M. Curie-Skłodowska, Serie A*, vol. 51 (1997), pp. 93-107.
52. Different aspects of selfdecomposability, *MaPhySto Centre for Mathematical Physics and Stochastics*, Aarhus University, Miscellanea vol. 11 (1999), pp. 84-90. [Also in *Lévy Processes: Theory and Applications*, O.E. Barndorff-Nielsen Editor. Birkhauser, Boston 2001, pp. 367-377.]
53. s-stable laws: an application in insurance and a generalization to nilpotent Lie groups. *J. Theor. Probab.*, vol. 12 (1999), pp. 1089-1107. (with D. Neuenschwander).
54. Selfdecomposability, stopping times and perpetuity laws, *Probab. Math. Stat.*, vol. 19 (1999), pp. 413-419.

2000 - 2004

55. Large deviations for some Poisson random integrals; *Seminar des Probabilities XXXIV*; Azema, Bakary and Yor Eds. *Lecture Notes in Math.* vol. 1729 (2000), pp. 387-392. (Co-author L. Wu).
56. A note on gamma random variables and Dirichlet series, *Stat. Probab. Letters*, vol. 49 (2000), pp. 221-226.
57. Three algebraic problems in probability theory, *Contemporary Mathematics*, vol. 261 (2000), pp. 221-226.
58. Lee-Yang models, selfdecomposability and negative definite functions. In: High dimensional probability II; E. Giné, D. M. Mason, J. A. Wellner Edtors; *Progress in Probability*, vol. 47, pp. 349-367, Birkhauser 2000. (Co-author J. DeConinck.)
59. 1-D Ising models, geometric random sums and selfdecomposability, *Reports in Math. Physics*, vol. 47 (2001), pp. 21-30.

- 60.** Remarks on the selfdecomposability and new examples, *Demonstratio Mathematicae*, vol. XXXIV(2), (2001), pp. 241-250.
- 61.** Kazimierz Urbanik and his research, *Demonstratio Mathematicae*, vol. XXXIV(2), (2001), pp. 219-239. (Co-authors: J. Rosinski and W. A. Woyczynski).
- 62.** A special volume dedicated to Kazimierz Urbanik; *Demonstratio Mathematicae* XXXIV(2) (2001), pp. 215-512, W. Dzibdziela, Z. J. Jurek, A. Plucińska and Ł. Stettner. Editors
- 63.** On fixed points of Poisson shot nose transform, *Advances in Appl. Probability*, vol. 34 (2002), pp. 798-825. (Co-author A. M. Iksanov).
- 64.** Shot noise distributions and selfdecomposability, *Stochastic Anal. Applications*, vol. 21 (3), (2003), pp. 593-606. (Co-author A. M. Iksanov.)
- 65.** Generalized Lévy stochastic areas and selfdecomposability, *Stat. Probab. Letters* vol. 64, (2003), pp. 213-222.
- 66.** The random integral representation hypothesis revisited: new classes of s-selfdecomposable laws. In: *Abstract and Applied Analysis*, Proc. International Conf. Hanoi, Vietnam, 13-17 August 2002; World Scientific, June 2004, pp. 495-514.
- 67.** A new factorization property of selfdecomposable probability measures, *Ann. Probab.*, vol. 32 (2004), pp. 1356-1369. (Co-authors: A. M. Iksanov and B. M. Schreiber).
- 68.** Selfdecomposable laws associated with hyperbolic functions, *Probab. Math. Stat.*, vol. 24 (2004), pp.41-50. (Co-author M. Yor).

2005 - 2009

- 69.** Kazimierz Urbanik (1930-2005), *Probab. Math. Stat.*, vol. 25 (2005), pp. 1-22. (Co-authors: J. Rosinski and W. A. Woyczynski).
- 70.** Cauchy transforms of measures viewed as some functionals of Fourier transforms, *Probab. Math. Stat.*, vol.26 (2006), pp. 187-200.
- 71.** Random integral representations for free-infinitely divisible and tempered stable distributions, *Stat. Probab. Letters*, vol. 77, (2007), pp. 417-425.
- 72.** A calculus on Lévy exponents and selfdecomposability on Banach spaces, *Probab. Math. Stat.*, vol. 28 (2008), pp. 271-280.

73. On relations between Urbanik and Mehler semigroups, *Probab.Math. Stat.*, vol. 29 (2009), pp. 297-308.

74. A note on a composition of two random integral mappings \mathcal{J}^β and some examples, *Stoch. Anal. Appl.*, vol. 27 (2009), pp. 1212-1222. (Co-author: A. Czyżewska-Jankowska).

2010 - 2014

75. Factorization property of generalized s-selfdecomposable measures and the class L^f distributions, *Teor. Veroyatnost. Primenen.*, vol. 55 (2010), pp, 812-819. (Co-author A. Czyżewska-Jankowska). [Russian edition]

76. Factorization property of generalized s-selfdecomposable measures and the class L^f distributions, *Theor. Probab. Appl.*, vol. 55 (2010), pp. 692-698. (Co-author A. Czyżewska-Jankowska). [English edition]

77. The random integral representation conjecture: a quarter of a century later, *Lithuanian Math. J.*, vol. 51, (2011), pp. 362-369.

78. Remarks on restricted Nevalinna transforms, *Demonstratio Math.*, vol. XIV, (2012), pp. 297-307.

79. Invariant measures under random integral mappings and marginal distributions of fractional Lévy process, *Stat. Probab. Letters*, vol. 83 (2013), pp. 177-183.

80. A random integral calculus on generalized s-selfdecomposable probability measures, *Sankhya A* , vol. 76, Issue 1 (2014), pp. 1-14.

81. The strong mixing and the selfdecomposability properties, *Stat. Probab. Letters*, vol. 84, (2014), pp.67-71. (Co-author R. C. Bradley).

82. Remarks on the factorization property of some random integrals, *Stat. Probab. Letters*, vol. 94 (2014), pp. 192-195.

2015 - 2019

83. On central limit theorem for shrunken weakly dependent random variables, *Houston Journal Math.*, vol. 41 , no 2, (2015), pp. 621-638. (Co-author R. C. Bradley).

84. Strong mixing and operator-selfdecomposability, *J. Theor. Probability*, vol. 29, (2016), pp. 292-306. (Co-author R.C. Bradley.)

85. On a method of introducing free-infinitely divisible probability measures, *Demonstratio Math.* , vol.49 no 2, (2016), pp. 236-251.

86. Remarks on compositions of some random integral mappings, *Stat. Probab. Letters*, vol. 137, (2018), pp. 277-282.

2020 -

87. On a relation between classical and free infinitely divisible transforms, *Probab. Math. Stat.*, vol. 40, (2020), pp. 349-367.

88. On a limit theorem for a non-linear scaling, *Stat. Probab. Letters*, vol. 177, (2021), 109163. [Also on: arXiv:1906.10522].

89. On background driving distribution functions (BDDF) for some selfdecomposable variables, *Mathematica Applicanda*, vol.49 no2 (2021), pp. 85-109. [Also on: arXiv:2109.02043 [Math.PR] 5 Sept.2021].

90. Background driving distribution functions and series representations for log-gamma selfdecomposable random variables, *Teor. Verojatnost. Primenia*, vol. 67 no 1, (2022), pp. 134-149. [Russian edition.]

91. Background driving distribution functions and series representations for log-gamma selfdecomposable random variables, *Theor. Probab. Appl.*, vol. 67 no 1, (2022), pp.105-117.[English edition]

92. Urbanik type subclasses of free-infinitely divisible transform, *Probab. Math. Stat.*, vol. 42 (2022), pp. 23-39. [Also on arXiv:2109.02105]

93. Which Urbanik class L_k , do the hyperbolic and generalized logistic characteristic functions belong to ? *Stat. Probab. Letters*, vol 197 (2023) 109814

94. Some definite integrals arising from selfdecomposable characteristic functions, *Lithuanian Math. J.*, vol. (2023)
